Coyote Fever - the DVD

The Art of the 2" Circle

I wrote *Coyote Fever* back in 1978, now 37 years later it ranks as the No. 1 best selling coyote trapping book ever. In this instructional DVD I have visually shown the viewer the methods and techniques that I have employed over the past 36 years to trap coyotes. Those of you who have followed my career know I'm from PA and have worked my way west, via seven years in Kansas, to settle here in the Rockies of NM for the past 29 seasons. Through these years of commercial long lining I've piled up some catches that border on the unbelievable to the average trapper. I don't mean this as a boast but merely a fact. That know-how is now available to you herein. Enjoy.

Fox Trapping Across America - the DVD

The Art of the 2" Circle

I wrote, Fox Trapping Across America over 32 years ago, after trapping fox in 50 counties from Pennsylvania to Arizona to Montana to Louisiana. The book was a huge success, but now through video I am presenting you the visual version of how to catch red and gray fox, under all conditions and habitats. We start in ideal November conditions and trap into January's frozen ground and deep snow. Plus lots more valuable information on how to, when to and where to make your sets. Preparing and selecting equipment. The proper use of lures, baits and urines. Maintaining a trapline, plus much more. The know-how lies within to simply catch lots of red and gray fox.

On the Prowl for Bobcats - the DVD

The Art of the 2" Circle

I wrote On the Prowl for Bobcats back in the mid-80s and it was a hit with the trapping world. Now I present you with the video version. Like the book, I will take you step by step from the equipment shed to the field, in a matter-of-fact no-nonsense style, that has always been my trademark. I will detail the how to, when to, and where to make your sets. We will deal with the elements, from frozen, to wet, to snow covered ground and catch bobcats in all the conditions. Plus lots more knowledge on correctly maintaining a trapline, preparing and selecting equipment, proper use of lures, baits, urine and other attractors. Herein lies the methods I've employed to catch several hundred bobcats and over 10,000 predators in my trapping life.
